NEXT GENERATION WATER REPELLENCY

WHAT IS AQUAPEL?

Aquapel™ is the next generation in water repellency performance. Aquapel modifies fabric at the molecular level by permanently attaching hydrophobic 'whiskers' to individual fibers that elevate liquids, causing them to bead and roll right off the fabric surface. It features a hydrocarbon polymer which is both more ecologically friendly and economically smart. The result is excellent performance-liquid repellency that's breathable, durable and fast drying- while remaining both fluorocarbon free and PFOA free

BENEFITS OF AQUAPEL

- Repels the elements
- Resists spills
- Maintains breathability
- Eco-friendly technology
